

WORKPLACE SAFETY

At PICHA Projects we recognise that every business and organisation has a duty of care; this is spelt out in the Occupational Health and Safety legislation to ensure the health and safety of:

- Our own staff and our valued clients
- The general public
- Sub-contractors and supplies working on PICHA Projects behalf

Contracting works to others doesn't remove any of our liability we have regarding everyone's workplace safety and we are committed to making every work site compliance with relevant legislation.

There is an obligation on your part as the issuer of works to monitor and regulate the conduct of contractors, ensuring they fully comply with all legislation.

We are committed to workplace health and safety and your duty of care. Our Health and Safety Management System procedures include but are not limited to:

- Safe Work Method Statements
- Site Inductions
- Site safety plans and documentation
- Regular Toolbox Meetings
- Competent Site Supervision
- Providing compliant safety equipment to all contractors
- Employment of fully qualified tradespeople

The importance we at PICHA Projects put on workplace safety and training is paramount and just as important to us as producing an amazing product that you are and your organisation happy with. At the end of the day, our goal is to deliver projects on time, to budget and make sure everyone makes it home safe to the family and loved ones.
